

Wound Care & Hyperbaric Medicine Center

Centra Medical Group Wound Care & Hyperbaric Medicine Center is an outpatient program that focuses on chronic and non-healing wounds. Our center provides wound care that includes wound assessment and treatment, as well as the option of hyperbaric oxygen therapy at our Lynchburg location. Our providers follow treatment protocols specifically established for each type of wound, using the most up-to-date approaches to wound healing.

TREATMENTS:

- Comprehensive wound assessment with photo documentation
- Advance wound care modalities
- Debridement of non-vitalized tissue
- Bio-engineered tissue alternatives
- Compressions therapy
- Diabetic foot management
- Labs, imaging, scans
- Negative pressure therapy/vacuum assisted closure
- On-site non-invasive vascular testing
- Surgical revascularization
- Total contact casting
- Coordination of home-care services and at-home delivery of wound care products
- Hyperbaric oxygen therapy
